CAPABILITY STATEMENT

MJC Solutions

COMPANY OVERVIEW

MJC Solutions, LLC is a nimble small business offering rapid-response janitorial and facility support services for federal agencies. Our model enables agencies to maintain clean, safe, and operational spaces—even on short notice. Through strategic partnerships and streamlined onboarding, we deliver insured, W-2 janitorial staff with minimal administrative burden.

CORE COMPETENCIES

- **Mission-Ready Facilities:** We provide a clean, safe, and professional environment that directly supports your agency's mission, enhances employee morale, and protects your property's value.
- **Performance & Quality Assurance:** Implement APPA-standard cleaning and data-driven quality control, with regular inspections and reporting to guarantee full contract compliance and transparency.
- **Service & Process Optimization:** Utilize Lean/Six-Sigma cleaning methods to increase efficiency, reduce waste, and perform all duties without disrupting your critical daily operations.
- **Health & Safety Compliance:** Deploy certified teams trained in OSHA standards, modern sanitation protocols, and the correct handling of chemicals to mitigate risk and ensure a healthy workplace.
- **Specialized Environment Services:** Offer expert cleaning for sensitive areas, including post-construction sites, medical-grade sanitation, and floor care/restoration projects.
- **Integrated Operations & Surge Support:** Serve as a single point-of-contact for all custodial, grounds, and light maintenance needs. We provide reliable surge support for emergencies or special events, all on one simple invoice.

KEY DIFFERENTIATORS

Agile Small Business: You work directly with dedicated, empowered site leadership, not layers of regional account managers. This ensures rapid, decisive action on your needs, flexible scheduling for special events, and absolute accountability. Our size lets us turn your requirements into a fully executed cleaning plan in days, not weeks.

Single-Source Solution: We simplify procurement and guarantee consistent quality by offering a unified contract for all your facility needs: core janitorial, deep cleaning, groundskeeping, and light maintenance. This eliminates finger-pointing between vendors, reduces your administrative burden, and creates operational synergy that siloed contractors miss.

Data-Driven Approach: Our foundation in performance management means every cleaning plan is customized and every outcome is measured. We provide clear inspection reports and quality scorecards that prove ROI and justify the investment in your facility's upkeep. We don't just promise clean; we provide the data that demonstrates it.

Proven Service Delivery Methodology: Our structured Assessment—Planning—Execution—Review framework is applied to every site, ensuring repeatable success and predictable, high-quality outcomes. We build a dynamic service plan that adapts to your changing needs, guaranteeing continuous improvement and demonstrable value.

Compliance-Focused Delivery: We mitigate risk by embedding federal and industry safety standards (OSHA, CDC guidelines, chemical handling protocols) directly into our service delivery and staff training. Our proactive approach ensures your facility is not just clean but safe, with auditable procedures that give you peace of mind and are ready for any inspection.

CORE VALUES

Integrity: Upholding the highest ethical standards and full transparency in every engagement to build lasting trust.

Excellence: Delivering superior quality and measurable results that exceed client expectations and advance their mission.

Agility: Leveraging our streamlined structure to provide rapid, responsive, and flexible solutions to evolving government challenges.

Mission-Focus: Aligning our success directly with the achievement of each client's critical mission objectives.

NAICS CODES

Primary Capability

561720 - Janitorial Services

Our core business, covering comprehensive cleaning for building interiors, windows, and all routine maintenance cleaning services.

Supporting Capabilities

561210 - Facilities Support Services

Integrated, bundled services including janitorial, maintenance, and waste management under a single point of contact.
